REMARKS/ARGUMENTS

Favorable reconsideration of this application, in view of the present amendment and in light of the following discussions, is respectfully requested.

Claims 1-20 are currently pending in the application. No claims have been amended, canceled or added herewith. The specification, however, has been amended to address the objection to the specification's use of trademarks. The changes to the claims are self-supporting and do not introduce any new matter.

In the outstanding Office Action, the specification was objected to as containing informalities corresponding to trademarks, the declaration was objected to as containing an incorrect serial number, the claims were rejected for double patenting, and the claims were otherwise indicated as allowable.

In response to the objection to the specification, the specification has been amended to address the objection to the specification's use of trademarks. Thus, it is believed that the previous objection should now be withdrawn.

In response to the objection to the declaration, a new declaration has been submitted herewith which corrects the typographical error in the serial number. Thus, this objection should now be withdrawn.

In response to the double patenting rejection, filed herewith is a terminal disclaimer which renders moot that ground for rejection.

Consequently, in view of the present amendment and in light of the above discussions, the outstanding grounds for rejection are believed to have been overcome and the claims are believed to be in condition for allowance. An early and favorable action to that effect is respectfully requested.

Respectfully submitted,
